

C Class ServerLan - Multi-Platform Server Enclosure

SUN Server Application

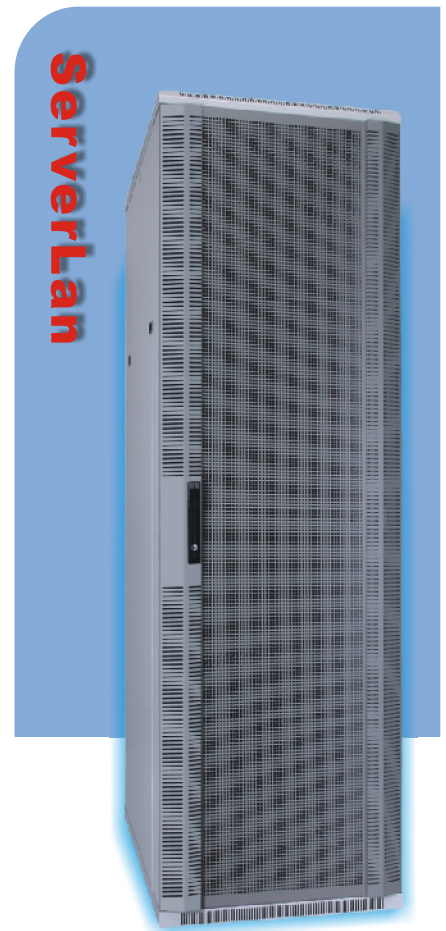

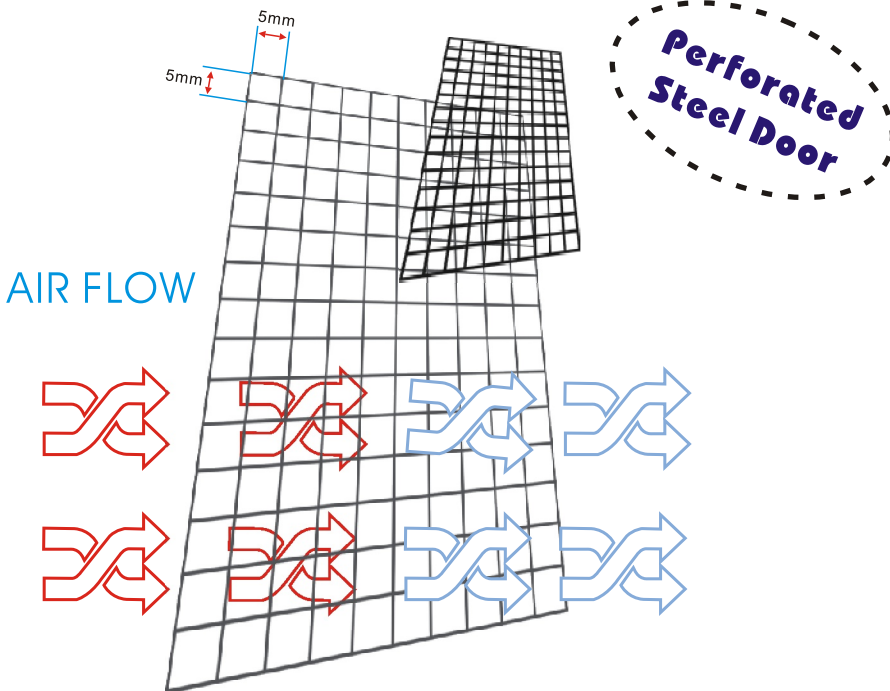

Patching Application

IBM Server Application

For server cabinets is thermal management, and again C Class ServerLan sets a new standard with steel perforated door featuring a 75% open area. Steel or glass perforated doors at the front or rear are standard on C Class ServerLan Enclosure. Also includes a vented top panel with integrated cable entry panel.

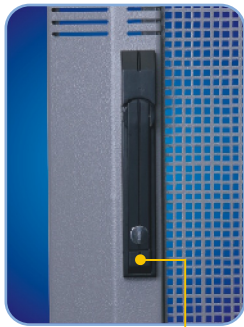

C Class was designed to be both flexible and affordable. When you place your order, you get (and pay for) only as many features as you need for your application.

To make it easy for you, C Class is offered in few basic configurations. One of these units may be sufficient for your application. If not, choose from the extensive range of CTL accessories to build the system you require.

Basic Package Configurations

1. Heavy duty frame, top and base with cable entry (1000kg static load)
2. Perforated glass front door w/ swing handle lock
3. Perforated steel rear door w/ swing handle lock
4. Quick release side panel w/ clip lock x2
5. Full height adjustable 19" panel mounting angle w/ U marking x 4
